

JAISON K SEBASTIAN

Angular & .NET Developer | Manufacturing Systems & Web Applications

✉ officialjaisonksebastian1999@gmail.com 📞 8925813531 📍 New Delhi, India

PROFESSIONAL SUMMARY

Angular and .NET Developer with 3.6+ years of professional experience in designing and developing **enterprise-grade web applications, manufacturing execution systems (MES), and data-driven platforms**. Strong expertise in **Angular, .NET Core MVC, C#, SQL Server, Entity Framework, and Azure Cloud services**. Proven ability to build **secure, scalable, and high-performance full-stack applications**, develop **RESTful APIs**, and manage **complex SQL databases**. Experienced in **MES integrations, manufacturing data analysis, and production workflow optimization**. Passionate about leveraging **modern web technologies** to solve real-world business problems and improve operational efficiency.

TECHNICAL SKILLS

Frontend Angular HTML CSS JavaScript TypeScript Bootstrap jQuery	Backend .NET Core MVC, .NET Framework, C#, Entity Framework, REST APIs
Database SQL Server, Basic Database Design, Query Writing, Data Migration	Cloud (Basic) Microsoft Azure (Basic knowledge), Azure App Services, Azure SQL Database
Manufacturing & Systems: MES Systems, RFID Integration, Manufacturing Data Processing	Development & Support Tools: Git, GitHub, Visual Studio, VS Code, Postman, ServiceNow

PROFESSIONAL EXPERIENCE

Engineer – Associate Manufacturing IND, <i>First Solar Power India Private Limited</i>	09/2022 – Present Chennai
- Developed and supported enterprise web applications using Angular, .NET Core MVC, C#, and SQL Server to enable manufacturing data reporting, efficiency analysis, and audit compliance. - Monitored and integrated Manufacturing Execution Systems (MES) with backend services and REST APIs to ensure accurate real-time solar panel production data, improving system reliability and reducing downtime. - Designed and optimized SQL Server databases, performed data migration from manufacturing tools to MES databases, and acted as Data Custodian to improve data availability for analytics and decision-making. - Built a .NET Core MVC reporting application for daily solar module efficiency (532W & 535W), streamlining sales reporting and government audit uploads.	

PROJECTS

Project1: Manufacturing Reporting & RFID Tracking System

07/2023 – 12/2023

Angular | .NET Core MVC | SQL Server | Azure

Designed and developed **Angular dashboards** to visualize real-time manufacturing production metrics, efficiency reports, and system alerts.

- Implemented backend services using **.NET Core MVC** and **REST APIs** to fetch, process, and expose **MES production data**.
- Designed and maintained **SQL Server tables** for RFID data storage, enabling accurate panel tracking and improved manufacturing traceability.
- Integrated **RFID-based tracking logic** with MES systems to reduce manual tracking and improve data accuracy.
- Deployed and supported the application on **Azure (basic usage)**, ensuring secure access, scalability, and improved data-driven decision-making.

Project2: Online Charity Management System,

Angular | .NET Core MVC | SQL Server

- Designed and developed a **full-stack web application** for managing charity donations and NGO fund distribution.
- Built a **responsive Angular frontend** for donor registration, donation tracking, and NGO management.
- Implemented backend business logic using **.NET Core MVC** and **Entity Framework**, ensuring secure and reliable data handling.
- Developed **role-based access control** for Admin, Donor, and NGO users.
- Integrated **SQL Server** to manage donor details, transactions, fund allocation records, and reporting.

Project3: Online Food Order Processing System,

Angular | .NET Core | SQL Server

- Developed a responsive **Angular-based frontend** for menu browsing, order placement, and user interaction.
- Created **RESTful APIs** using **.NET Core** to manage users, orders, sellers, and order status workflows.
- Designed and implemented **SQL Server database schemas** for users, orders, payments, and food inventory.
- Built an **admin and seller dashboard** to manage food listings, pricing, and availability.
- Improved application performance through **modular code structure**, optimized queries, and reusable Angular components.

EDUCATION

Bachelor of Computer Applications (BCA),

01/2018 – 11/2021

Himalayan Garhwal University
